

M.R.L. Cabinet Measurement Checklist

1. Measure your overall wall space or desired space of new cabinets.
2. If you have any windows, measure from one end of the wall to the center of window. Then measure the overall size of the window's height and width including the trim. Repeat this step for all windows.
3. For your sink, measure from one end of the wall to the center of the drain pipe under your sink.
4. Measure all appliances' (refrigerator, stove, dishwasher. etc.) widths and center locations from the end of the wall.

**This should ensure a complete and accurate drawing,
provided measurements are correct.**
